

Our Approach

Holistic Approach: In order to have long-term effectiveness, it is important for us to have a holistic management approach. We focus on developing strong partnerships and maintaining secure collaborations with financial and technical support institutions. These connections combined with our strong social and developmental model, enable sustainable impact towards our shared goals.

Project Model

We empower the local youth and work with towards complete development of their communities. Our end-to-end project management strategy includes initiating, planning, implementing, monitoring and closing.

Accountability Model

We provide project accounts and activity reports at periodic intervals throughout the project. At our closing stage, we provide a final financial accountability report that identifies where and how the funds were used.

Sustainability Model

Our empowered community leaders continue to be torch bearers for their community long after project timelines are over making our impact sustainable.
